1. Team Meeting Logs

| Date | What Was Discussed/Done |
|---|---|
| November 15, 2023 - Library - All members | - Majority of Checkpoint 1 was completed, agreement to make a website for student course registration - Majority of wireframes and draft layout were created |
| November 17, 2023 - Group Chat - All members | - Wireframes and draft layout finished |
| November 29, 2023 - Library - All members | - Checkpoint 2 discussed - Table for php files for both student and admin sides created - Database tables (Students, Enrolled, Courses, and Admins) created |
| December 1, 2023 - Group Chat - All members | - Extra files and functions for php files added to Checkpoint 2 |
| December 5, 2023 - Library | - Login function & account creation for students completed - Pages for Student dashboard created |
| December 6, 2023 - Zoom Meeting - All members | - Discussion of progress of project - Decision on splitting work: <ul style="list-style-type: none">- Wanda: (view_current_schedule.php)- Nathan: (student_course_registration.php, admin login and pages for admin dashboard)- Richie: (add_course.php, |

| | |
|------------------|---|
| | edit_course.php, view_student_schedules.php) |
| December 9, 2023 | <ul style="list-style-type: none"> - view_current_schedule.php, student_course_registration.php, view_student_schedule.php, admin login and admin dashboard finished |

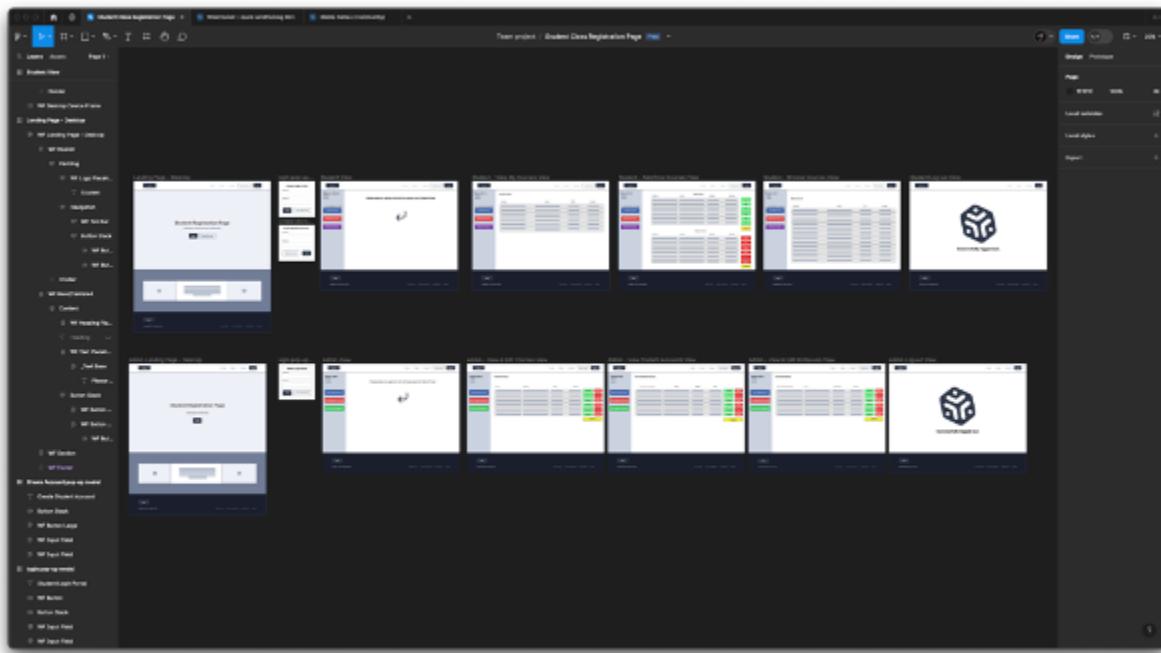

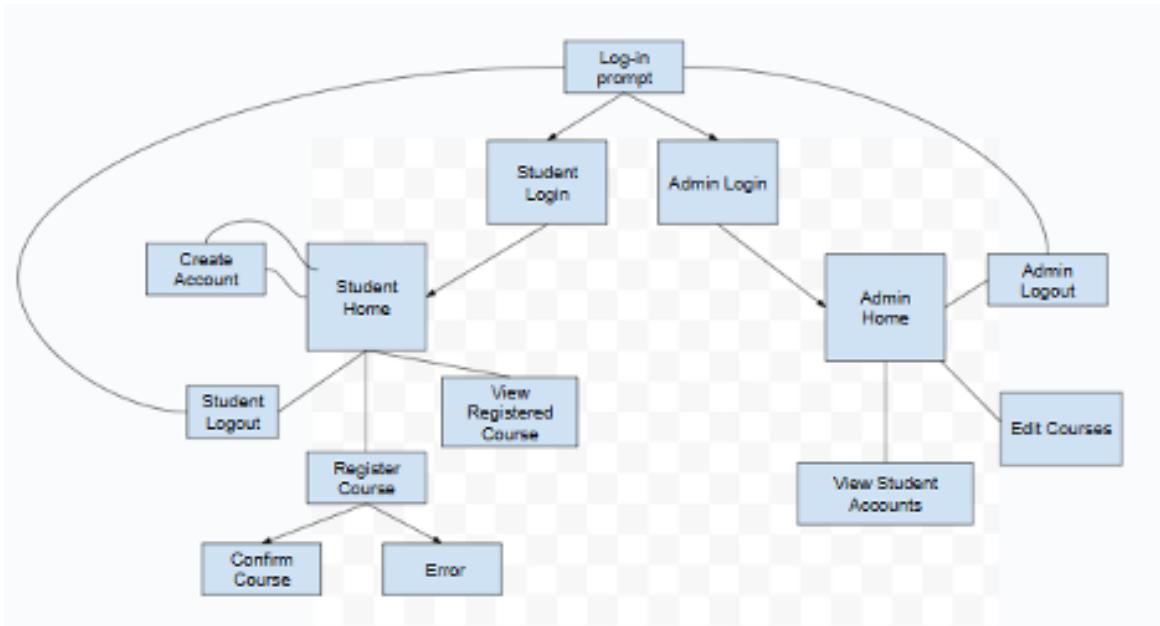

2. Contributions

| Wanda | Nathan | Richie |
|---|--|--|
| <ul style="list-style-type: none"> - Worked on draft layout - Worked on checkpoint 2 php pages - Co-coded student login - Coded student account creation - Created student, courses, and enrolled tables in database | <ul style="list-style-type: none"> - Worked on draft layout - Worked on checkpoint 2 php pages - Co-coded student login - Coded admin login - Coded admin dashboard - Created Admins table in database | <ul style="list-style-type: none"> - Worked on wireframes - Worked on checkpoint 2 php pages - Coded logout page - Codes pages for admin to add a course to Courses, edit a course, and viewing student schedules - Coded style sheet |

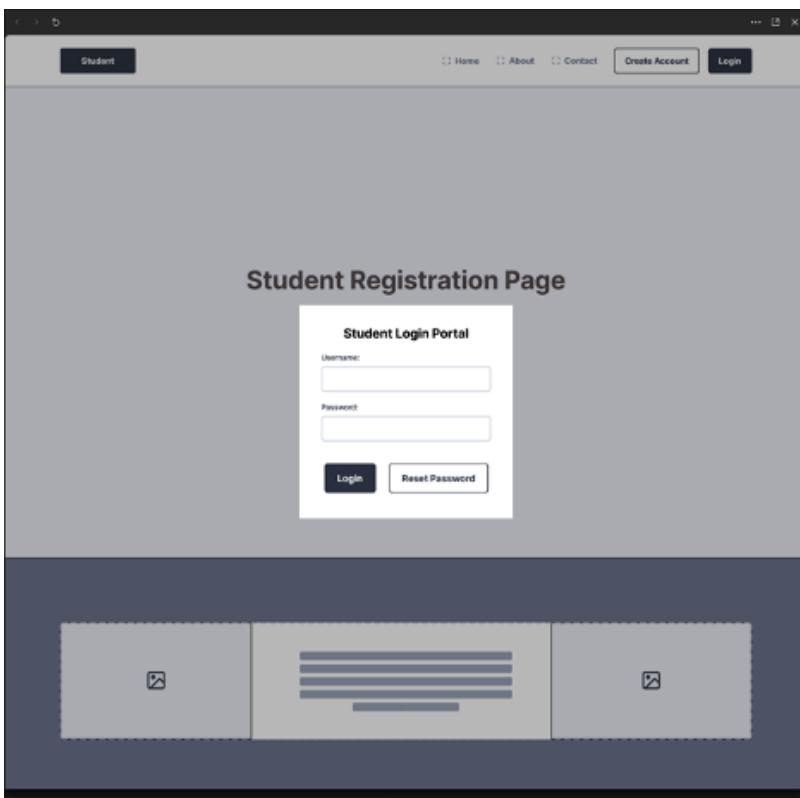

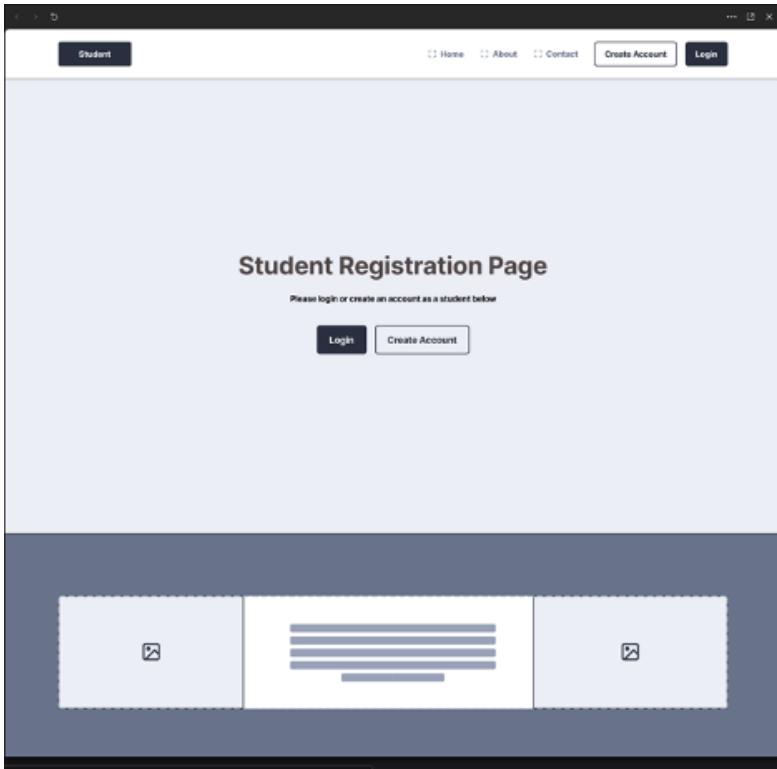

3. Project Summary

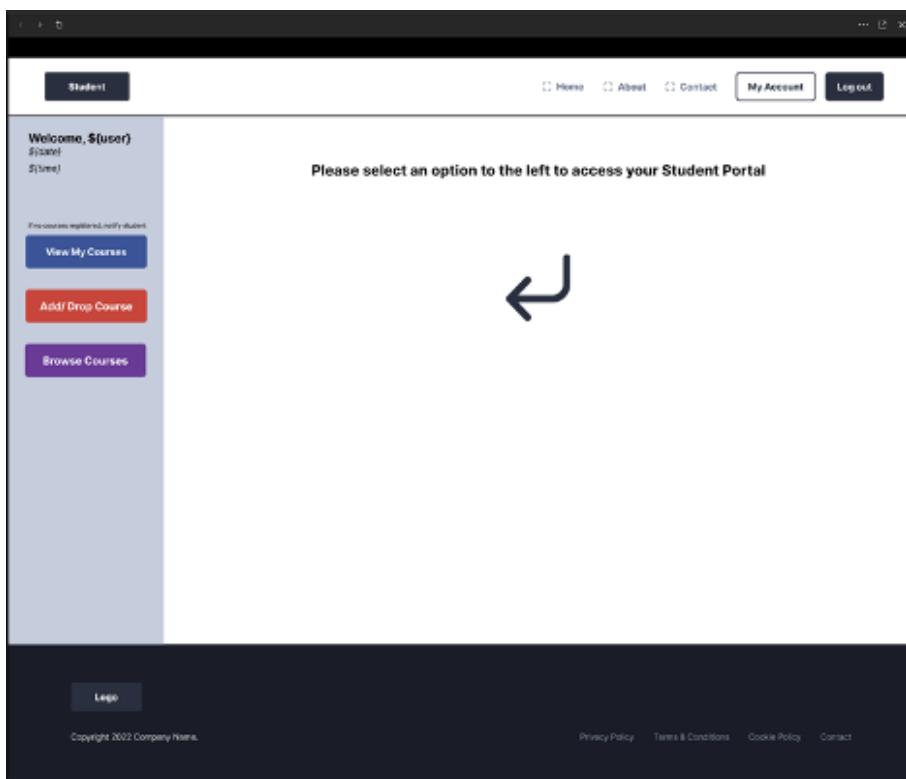

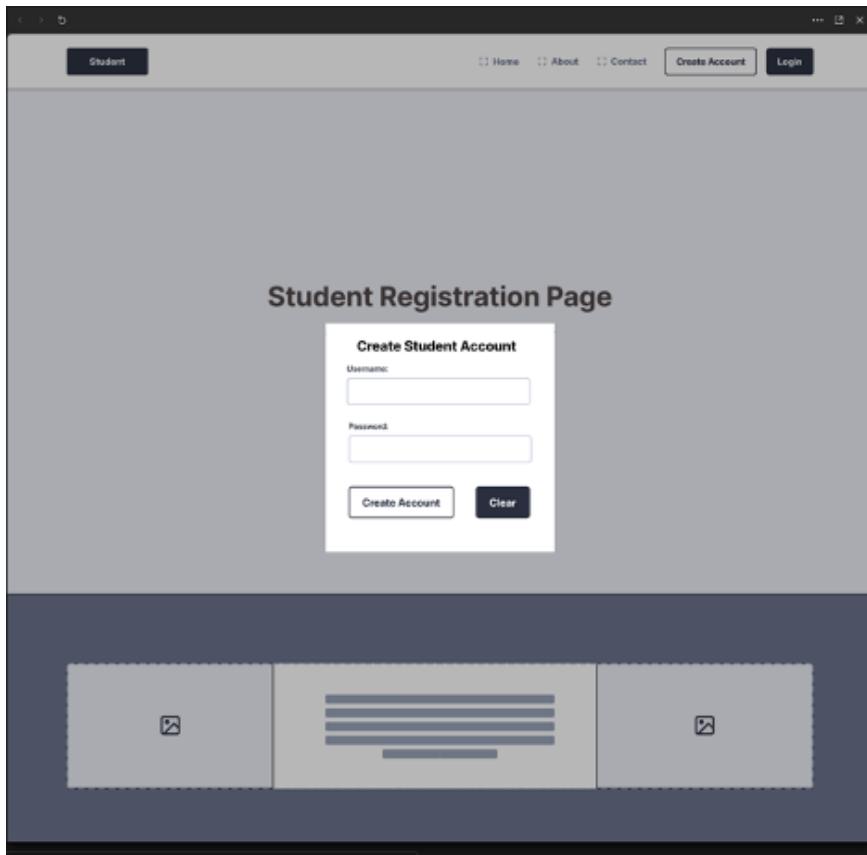

The purpose of this project was to successfully code a working website for both students and admins to access. Both students and admins can log in, students can solely create a new account for security purposes. Students are able to see a homepage with links to view their current schedule, add a course, and drop a course. The pages for adding a new course checks for time constraints, ex) if a student tries registering for a morning class on Tuesday when they already are registered for a class on that day and time, and will respond in such a case. Admins can edit/delete an existing course, add a new course, view existing student accounts, or delete a student account. These pages have been coded using HTML5 along with PHP, CSS, and SQL for the database.

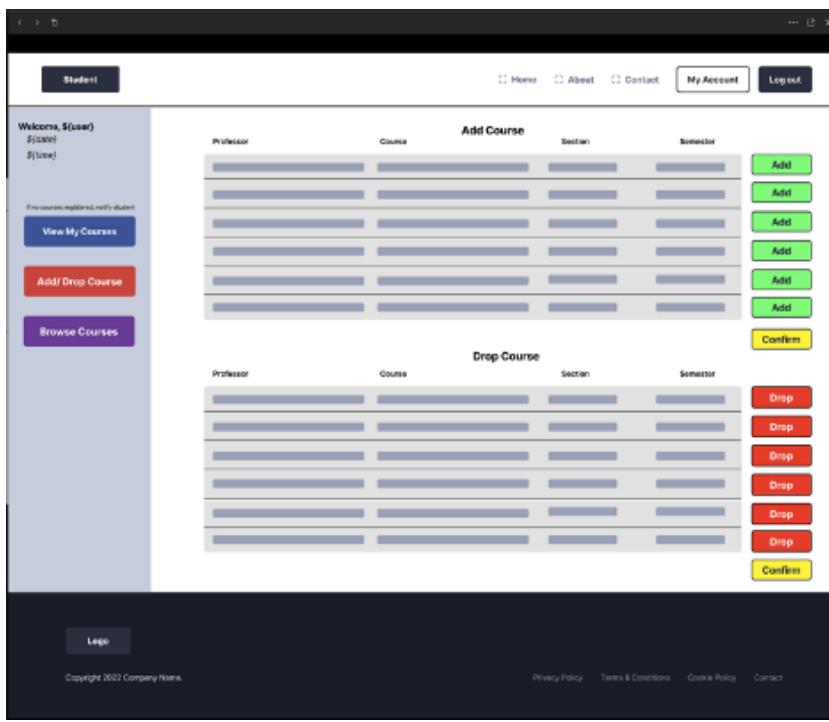

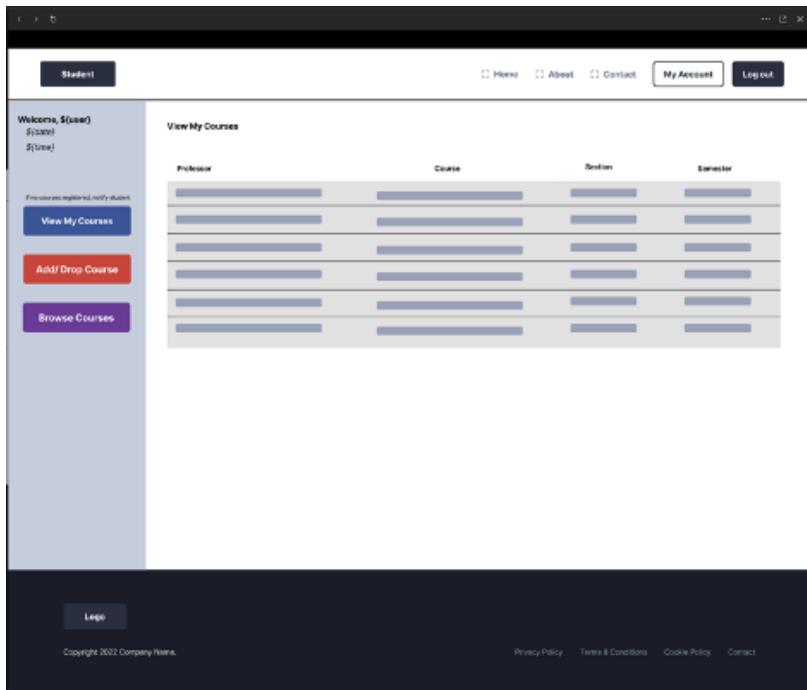

4. Wireframes

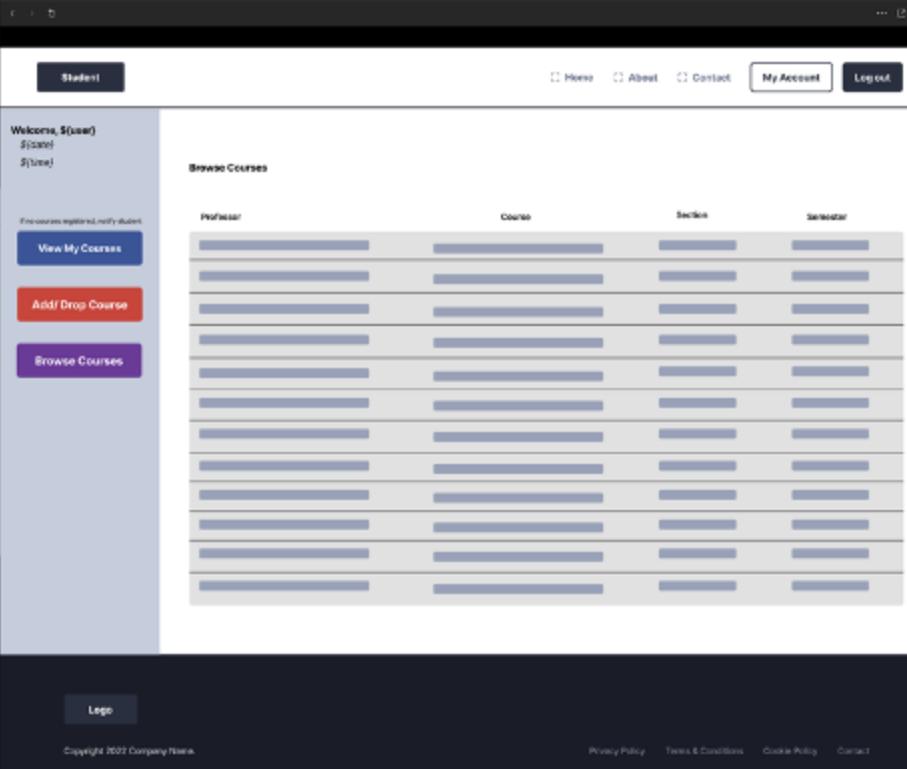

Student View

The header of a web-based course management system. It features a dark blue header bar with the title "Course Management System" in white. Below this is a light gray navigation bar with several links: "Home", "About", "Contact", "My Account", and "Logout". On the far right of the header, there are three small icons: a user profile, a gear, and a search icon. The main content area has a light gray background. On the left, a vertical sidebar for "Student" users displays a welcome message "Welcome, \${user}" followed by their name "\${name}". It includes three buttons: "View My Courses" (blue), "Add/Drop Course" (red), and "Browse Courses" (purple). The main content area contains a section titled "Browse Courses" with a table. The table has four columns: "Professor", "Course", "Section", and "Semester". Each row represents a course entry, with each column containing a long, thin blue horizontal bar. At the bottom of the page, there is a footer bar with links to "Privacy Policy", "Terms & Conditions", "Cookie Policy", and "Contact". A "Logo" placeholder is also present at the bottom left.

Admin View

The image displays two screenshots of a web application interface, likely a student management system, under an 'Admin' view.

Top Window: Student Registration Page

This window shows a 'Student Registration Page' header. Below it is a 'Admin Login Portal' form containing fields for 'Username' and 'Password', and buttons for 'Login' and 'Reset Password'. The background features three large, light-gray rectangular boxes with small icons in the corners.

Bottom Window: Admin Portal

This window shows a 'Welcome, Admin' message and a note: 'Please select an option to the left to access the Admin Portal'. On the left, there is a sidebar with three buttons: 'View & Edit Courses' (blue), 'View Student Accounts' (red), and 'View & Edit Professors' (green). A large black arrow points from the right side of the bottom window towards the left side of the top window.

Page Footer

At the very bottom of the page, there is a dark footer bar containing the text 'Copyright 2022 Company Name.' and links for 'Privacy Policy', 'Terms & Conditions', 'Cookie Policy', and 'Contact'.

5. User Manual

These pages also work with a database with four tables, one table for admins named “admins” that hold admin names, usernames, and hashed password, and three others for students and courses: “students”, “enrolled”, and “courses”. The “students” table keeps track of student accounts, holding student ids (a primary key), names, usernames, and hashed passwords. The “courses” table holds the information for existing courses, holding course id (a primary key), name, instructor, day held, and time held. The “enrolled” table tracks which student is enrolled in what course. This is done using its two attributes, sid and cid, as foreign keys referencing “students” and “courses” respectively.

The website’s starting point, index.php, first prompts the user to either log in as a student or admin. Logging in as a student has the option to create an account which will take you to student_createAcc.php. Logging in will create a new session that holds superglobal values of the student’s information like name and id. After creating an account and/or logging in as a student, there will be 4 options (each their own page) for the student to interact with: viewing their current schedule which displays a table of their enrolled classes, adding a course which gives the student a drop down menu to add an available course, and dropping a course which also gives a drop down list of currently enrolled courses to drop. Finally, there’s the logout function which kills the current session and variables.

On the admin side, logging in will also start a new session and take superglobal values associated with the user like their name. We have 3 pages aside from the home page: view student schedules which displays the schedules of all students, add a new course which adds a new course to the “courses” table, edit a course which has the options of either editing the information of an existing course or deleting a course from the “courses table”, or delete a student account from the “students” table. Like the student side, there is the same link to a logout page to kill the session associated with the admin currently logged in.

6. Database Schema

Example Structure:

admins

| <u>admin_name:</u> VARCHAR(60) | <u>admin_username:</u> VARCHAR(60) | <u>admin_password:</u> VARCHAR(60) |

| Current Schedule: | | | | | |
|-------------------|-----------|-------------------|------------------|-----|------|
| | Course ID | Course Name | Instructor | Day | Time |
| Add Course | 105 | Creative Writing | Prof. Anna Davis | Fri | AM |
| Drop Course | 102 | Algebra | Professor Sue | Tue | PM |
| | 106 | Molecular Biology | Dr. Chris Wilson | Mon | PM |

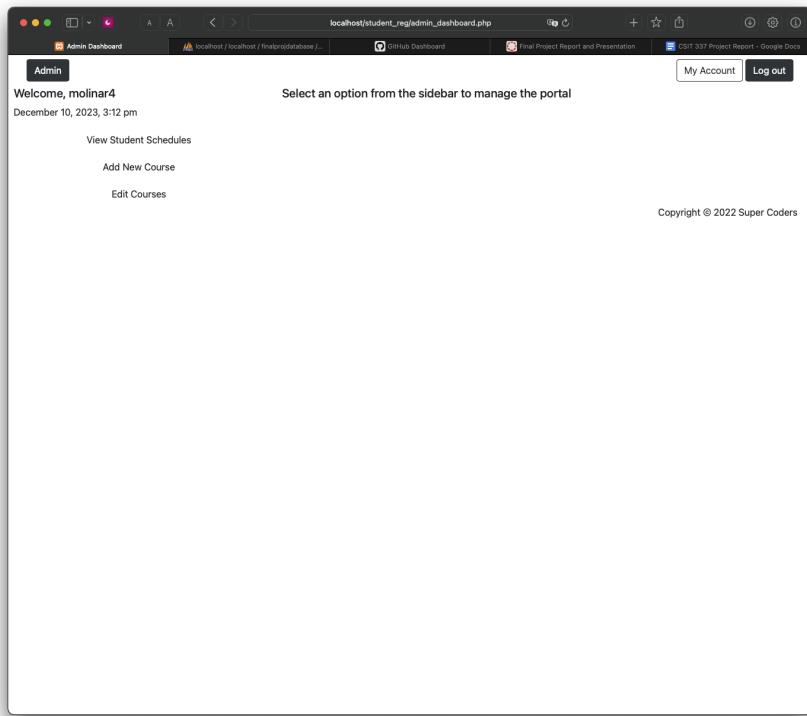

A screenshot of a web browser window titled "localhost/student_reg/student_dashboard.php". The browser has multiple tabs open, including "Student Dashboard", "GitHub Dashboard", and "Final Project Report and Presentation". The main content area displays a "Student" dashboard for "richo" on December 10, 2023, at 3:07 pm. It shows three buttons: "View My Courses", "Add Course", and "Drop Course". A message at the top says "Please select an option to the left to access your Student Portal Functions". At the bottom right, it says "Copyright © 2022 Super Coders." A tooltip at the bottom left says "Open \"localhost/student_reg/student_dashboard.php\" in a new tab behind the current one".

Admin Portal

A screenshot of a web browser window titled "localhost/student_reg/admin_login.php". The browser has multiple tabs open, including "Admin Login - University System", "GitHub Dashboard", and "Final Project Report and Presentation". The main content area features a large heading "Welcome to the" followed by "Clock" emoji, "Student Schedule Registration System" in bold, and a book emoji. Below this, a message says "More updates to functionality coming soon. Please check back again soon." There is an illustration of three construction workers. The "Admin Login Page" form is displayed, with fields for "Username" containing "molinar4" and "Password" containing ".....". Below the form are "Login" and "Home" buttons. At the bottom, a copyright notice reads "© 2023 University System. Super Coders All Rights Reserved."

Admin Add New Course to Courses list

A screenshot of a web browser window titled "localhost/student_reg/add_course.php". The title bar also shows "Admin Dashboard", "localhost / localhost / finalstudentdatabase...", "GitHub Dashboard", and "CSIT 337 Project Report - Google Docs". The main content area has a dark header with "Admin" and "Welcome, molinar4" followed by the date "December 12, 2023, 5:59 pm". Below this is a sidebar with links: "View Student Schedules" and "Edit Courses". The center of the page says "Add a new course to the Course Registrar below:". It contains several input fields: "Course ID: ", "Course Name: ", "Instructor: ", "Day: ", and "Time: ". At the bottom left is a blue "Add Course" button. At the bottom right is the copyright notice "Copyright © 2022 Super Coders".

Welcome, molinar4
